South Bend 24, Indiana

Issued for Information of Producers
Who Are Not Members of Cooperative Associations

Vol. V, No. 2

February 1961

JANUARY UNIFORM PRICE \$4.26

Dairy farmers will receive a uniform price of \$4.26 for January 1961 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent; will be adjusted by a differential of 7.3 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. This minimum price is subject to a 3 cent per hundredweight marketing service deduction, together with the authorized hauling charge.

PRODUCER RECEIPTS

Daily herd production is up to a high of 726# per day, compared to 616# a year ago. This is almost an eighteen percent increase in daily herd production, while the average daily increase for the whole market is only fourteen percent. A decrease in number of producers accounts for these differences in percentage. In comparison with December 1960 deliveries, production on a daily basis is up about 5.7 percent, which is about normal for this season.

CLASS I SALES

Class I sales for this marketing area were the highest in January 1961 since Order No. 67 was established. Of the 26 million pounds of producer milk, 19½ million were sold in Class I, or a percentage of 75.5. The percentage of Class I utilization is lower than in December by about 2 percentage points, even though we had more sales in January, but the cause of this is a 5½ percent increase in producer receipts.

DIETARY MILK PRODUCTS

A group of new milk products have come on the market in the last two months. These products are dietary products and advertised as such under several different names. They are sold as liquid or dry and are being classified as Class I, if liquid, and if dry, the skim milk needed to make them liquid is classified as Class I.

CLASS I PRICE

The Class I price for the February 1961 delivery period will be \$4.50 per hundredweight for 3.5 percent milk. This price was computed by adding \$1.10 per hundredweight to the average condensary pay price in January (\$3.42), minus the supply-demand adjustment of two cents. The supply-demand adjustment for the March 1961 delivery period will be a minus two cents.
